ICT /Computing Skills

The teaching learning process at Brick is integrated with the latest technologies. The academic planning too focuses on the programs that enrich the teaching learning process by the computer aided tools. The teachers as well as the students use a number of software. Teachers use it for delivering lectures, and sharing the data, whereas the students use a number of software in presenting their work for examinations and juries.

Following are the major initiatives taken by the institute.
1. Taking workshop on computing skills
2. Signing MOU with the organizations, who take weekly classes in the campus for enriching the computer skills in the students
3. Conducting elective courses on computers.

The students have demonstrated the works with use of these tools. In general students have geared up in following tools.
1. Autocad
2. Photoshop
3. Revit
4. Archicad
5. Lumion
6. GIS
7. For model making they are well equipped with preparation of right format for laser cut drawings.
8. Presentations on power point at public speaking platforms
9. Movie making
10. Blog and Vlog writing
